

GRADE 10 COMPUTER APPLICATIONS TECHNOLOGY MODULE GUIDE

The module focuses on three key topics: **network technologies**, **system technologies**, and **electronic communication**. You will develop digital literacy, technical understanding, and problem-solving skills to effectively navigate the digital world.

Module Outcomes:

By the end of this course, you will be able to:

Understand the fundamentals of network technologies, including different types of networks, network topologies, and protocols.

-  Explore System Technologies, learning about hardware components, their roles, and how they function within computing systems.
-  Manage and present digital information using various tools and techniques, with an emphasis on accuracy and efficiency.

- 📌 Understand the principles of Green Computing, including the steps to reduce environmental impact in computing.

Key Topics Covered:

- 📌 Network Technologies
- 📌 System Technologies
- 📌 Electronic Communication

Assessment matters

Online Quizzes	25%
Assignments	40%
Presentation	15%
Final Examination	20%

Total Semester Mark	100%
---------------------	------

To pass the module, students must achieve at least 50%.
